

Sheikh Limon

Full Stack Developer

Dhaka, Bangladesh · +880 1839 795 000 · sheikhlimondev@gmail.com · github.com/sheikhlimon · linkedin.com/in/sheikhlimon

ABOUT

Full Stack Developer with 1+ years building web applications from scratch. Contributor to production codebases at Red Hat (Podman Desktop) and the Linux Foundation (Goose), with merged pull requests reviewed by senior engineers at both organizations. Recognized as Goose Community All-Star (January 2026). Builds complete products: React/Next.js frontends, Node.js APIs, and PostgreSQL databases.

SKILLS

Frontend React, Next.js, Tailwind CSS, Zustand, Responsive UI/UX

Backend Node.js, Express, REST APIs, JWT Authentication, RBAC

Database PostgreSQL, MongoDB, Prisma ORM

DevOps Docker, GitHub Actions, Linux, Vercel, Render, Neon

Languages JavaScript (ES6+), TypeScript, Bash

PROJECTS

InfraScope — Infrastructure Monitoring Platform

Next.js · Node.js · PostgreSQL · Prisma

- Real-time dashboard with system stats, activity timeline, and status management (Active / Inactive / Scanning / Error)
- JWT authentication with role-based access control — separate Admin and User views
- Complete audit log with search and filter across all system activity
- Live: infra-scope.vercel.app · github.com/sheikhlimon/infra-scope

Crypto Guardian — Fraud Detection Service

React · Node.js · Express

- Risk scoring under 500ms per wallet address via Etherscan, BlockCypher, and CoinGecko
- 0-100 risk score with real-time fraud detection visualised in the React frontend
- Multi-source validation pipeline combining on-chain data with third-party API enrichment
- Live: crypto-guardian-frontend.vercel.app · github.com/sheikhlimon/crypto-guardian

QuickHire — Job Board & Application Platform

Node.js · Express · MongoDB · Prisma · Turborepo

- REST API with JWT auth, RBAC admin dashboard, job CRUD, and resume upload in a Turborepo monorepo
- Structured application submission flow with validation across auth, jobs, and applications endpoints
- Deployed frontend on Vercel and Express API server independently on Render with environment-based configuration
- Live: quick-hire-web-delta.vercel.app · API: quick-hire-dr7g.onrender.com

OPEN SOURCE EXPERIENCE

Full Stack Developer

March 2026 – Present

Red Hat — Podman Desktop · Remote

- Fixed API query parameter handling returning incorrect data across all affected endpoints ([PR #16599](#), merged)
- Resolved backend communication failures causing unexpected request errors in unstable network conditions
- Improved overall backend stability through targeted fixes reviewed by Red Hat's core engineering team
- Collaborated asynchronously with global maintainers — clear, concise PR descriptions for cross-timezone review

Full Stack Developer · Goose Community All-Star

October 2025 – Present

Linux Foundation — Goose Project · Remote

- Eliminated 20+ repeated authentication dialogs per session by fixing a macOS keychain prompt loop ([PR #6620](#), merged)
- Built graceful credential fallback for Linux headless and SSH environments ([PR #5808](#), merged)
- Added structured JSON output flag to the CLI for scripting and automation ([PR #5525](#), merged)
- Fixed session recovery flow generating repeated 404 errors on deleted sessions ([PR #5644](#), merged)

EDUCATION

Higher Secondary (HSC) — Incomplete

Khandaker Asaduzzaman Academy

2021 – 2022

Secondary School Certificate (SSC)

Dhaka Megacity College

2016 – 2018
